Brienne Database ReadMe doc	
File Name	Brienne_Letterlocking_Data_2021
See our dataverse Dataset ReadME 01 file for an summary of all related datasets containing related information to this Brienne Collection project including the datasets that contain the downloadable version of this spreadsheet and higher quality TIFF images of the letters.	Dataset. "01 ReadMe Unlocking history through automated virtual unfolding of sealed documents imaged by X-ray microtomography"; https://doi.org/10.7910/DVN/H2NUGV ; Harvard Dataverse.
Item inventoried	3148 items
Authors	Dambrogio, Jana; Starza Smith, Daniel; Akkerman; Nadine, van der Linden, David; Ahrendt, Rebekah; Unlocking History Research Group, 2021.
Licensing Information.	Letterlocking instructional resources can be accessed for non-commercial use under a Creative Commons Attribution–NonCommercial 3.0 License. Permission for commercial use must be sought from the Unlocking History Research Group. How to use this spreadsheet	
	This spreadsheet contains metadata for letters and documents in the Brienne Collection, as well as links to digital images of those letters.

	Column A gives the shelfmarks of individual letters from the Brienne Collection. Columns B and C show where these letters can be found in Dataverse. Column D supplies alternative coding if it exists: UH numbers if the letter is part of the Unlocking History dataset, LUV numbers if there is an instructional video for this letter. Columns E and F link to images of each letter. Columns G, H, and I show letterlocking information about each letter: its format (G), category (H), and current manifestation (I) (whether it is open, unopened, or partially opened).
Column A	Shelfmarks of individual letters from the Brienne Collection
Column B	Dataverse dataset name
Column C	Dataverse dataset DOI, internet link that lead to the folder containing TIFF images of a particular letter
Column D	Column C supplies alternative coding if it exists: UH numbers if the letter
Column E	List and names of image files in the order in which they appear in each
Column F	Column F links to Google Drive folder containing JPG images of a particular
Column G	Letterlocking Format (LF)
Column H	Letterlocking Category (LC)
Column I	Current manifestation of a letter (whether it is open, unopened, or partially
	At the level of individual letters, a series of short-form codes is used to describe letterlocking evidence. These are given in full here. For further discussion and definition of terms below, see letterlocking.org ; Dambrogio, Ghassaei, Smith, Jackson, et al., 'Unlocking History' in Nature Communications; Dambrogio and Smith Letterlocking; and the Dictionary of Letterlocking.
	Imagine conducted by Art in Print, SSU members, and Laura Bergemann, and Koos Havelaar.

General terms	
SSU	Signed, Sealed, and Undelivered (brienne.org)
UH#	Unlocking History number. Unlocking History Research Group assigns ID numbers (UH#) to our created tangible and digital collections. The UH Research Group Collections can be found in the MIT Libraries' Distinctive Collections MC0760.
LUV#	Letterlocking Unique Video number
LF#	Letterlocking format number
LC#	Letterlocking category number
i	We infer this category from the available evidence. If we infer a category for an unopened document, we do not count it as letterlocking since we cannot confirm that it is a letter until we know its contents.
Formats:	a system of numbers and upper-case letters is used to describe the silhouette of a letterpacket in its closed state.
3, 4, 5 etc	Numbers refer to number of sides of a letterpacket in its closed state.
R	rectangle
RW	rectangle wide
RXW	rectangle extra-wide
RT	rectangle tall
RXT	rectangle extra-tall
P	pentagon
S	square
SD	square diamond

Manipulations:	used to create a letterpacket (lower-case letters)
f	fold
t	tuck
a	adhere
s	slit
h	hole
lo	lock-O (lock fashioned from a source other than the writing substrate)
lsa	lock-SA (lock fashioned from the same source as the writing substrate, attached)
lsu	lock-SU (lock fashioned from the same source as the writing substrate, unattached)
Security score:	designated by three upper-case letters
Z	zero security
L	low security
H	high security
Other terms	
NOT_LL	A document in the Brienne Collection which is not an example of letterlocking
TBD	To be decided: it was not possible to decide the letterlocking status of this document
Need to consult further	This letter will repay further research
Part open / Partial open	The letter has not been fully opened but some attempt has been made in the past to open it
Unopen / Unopened	The letter has not been opened since it was secured shut for sending

Dissociated letter	Epistolary writing in the Brienne Collection without postal information and no longer associated with the wrapper, letter-wrapper, or enclosing locked letter in which they were originally sent.
Disassociated paper fragment	Materials (not letters) in the Brienne Collection without postal information and no longer associated with the wrapper, letter-wrapper, or enclosing locked letter in which they were originally sent.
Insert object	An object which was inserted inside a letterpacket as an enclosure
Addressed / No postage	The letterpacket bears an address but no postage marks, so was probably enclosed in a wrapper, letter-wrapper, or enclosing letter for postage.
No address	The letterpacket does not have an address on the address panel; its format cannot be judged by orientation to the address.
Missing not present	The existence of this letter is indicated by an old catalogue record, but it was not present when SSU conducted their inventory.
Verso no image / No verso image	A page from this letter was not imaged.
